### Client Extranet

A Krieg DeVault Client Extranet is a secure website customized just for your organization and legal team that delivers a single collaborative workspace for all the critical information surrounding your matter. It provides the ability to upload and download documents, manage and assign tasks, find and store contact information, and keep calendars of key dates and deadlines. The website is available 24 hours a day and accessible from virtually any computer with access to the internet and a web browser, giving you the flexibility to access the information you need when and where you need it.

If you are interested in developing a client extranet, please contact your lawyer at Krieg DeVault, and we will take it from there.
