

Life Sciences

At the intersection of health care, intellectual property, corporate law, and governmental affairs, Krieg DeVault offers creative solutions to the business needs of our life sciences clients, enabling them to turn scientific discovery into commercial success. Whether it's help with project or enterprise funding, capital formation, intellectual property protection and counseling, business transactions and joint ventures, products liability, clinical research, and other regulatory guidance, our lawyers combine legal skill and industry knowledge for focused planning that meets the challenges facing life sciences companies today. Our lawyers have technical experience in a range of fields related to life sciences, including biology, biotechnology, chemistry, diagnostics, medical and biomedical devices, and health care administration. We also have advised on health care and business incubation policy at senior levels of government and have extensive contacts among angel and venture investors and other private equity groups. As legal and business counselors to medical device, biologics and pharmaceutical companies, and university research organizations, we can provide comprehensive guidance to emerging and established life sciences companies at every stage of their growth and development.
