

Urology

Krieg DeVault is uniquely qualified to work with you on urology practice and related issues.

We regularly represent urology providers on legal, operational, and strategic matters. More than just a legal solutions provider, we are "in the trenches" with our urology clients. We address legal needs with practical solutions backed by years of urology-specific experience. There are few issues we have not handled, and we often work seamlessly with a client's existing legal team, where we provide targeted advice on complex issues with which we have more in-depth experience.

Representative matters include:

- Equity buy-in and sales of practices, surgery centers, cancer centers, and labs
- Regulatory compliance of compensation plans
- Professional service arrangements with hospitals for call coverage and other services
- Conflict of interest policies for outside vendor arrangements
- Alternative payment models with payors and health systems
- Urology physician recruitment and employment, including non-compete issues
- Urology practice acquisitions and mergers
- Urology private equity considerations
- Real estate development and sales
- Stark and Anti-Kickback issues
- HIPAA and HITECH issues
- Compliance program development, implementation, and training
- Government investigations, audits, and enforcement actions
- Intellectual property issues, including patents and trademarks
- Pharmaceutical issues, including prescribing and dispensing

- Governance documents
