

Renewable Energy

Krieg DeVault represents investors, lenders, sponsors, and developers in all aspects of renewable energy and infrastructure projects. Krieg DeVault deploys a team-oriented, multi-disciplinary approach to help its clients optimize outcomes in the fast-paced and high-growth industry sector. Krieg DeVault's representations cover all aspects of the development and financing of early-, mid-, and late-stage energy projects, including land control and real estate issues, land use, zoning, environmental, tax, corporate, project finance and energy regulatory. Over the last three years, Krieg DeVault's involvement in utility-scale wind and solar projects in Indiana represents approximately 3 GW of generating capacity that has been added to the grid or is under development.
