

## Health Law in 30 Webinar Series: Warning Signs You May Have a Qui Tam Relator & How to Treat Him/Her

November 29, 2018

The threat of *qui tam* actions under the False Claims Act persists, as whistleblowers continue to try and avail themselves of this potentially lucrative civil litigation. It is important to not only understand these claims, but to be able to spot the warning signs that you may have a potential or current *qui tam* relator working in your organization. Equally essential is to know how to treat such an employee: what rules must be followed and what strategies should be employed to deal with the situation properly and avoid a relation claim. This webinar will discuss the False Claims Act, primary requirements for liability, potential recoveries by relators, and navigating retaliation claims.
