

Upcoming Webinar - Don't be Surprised by Surprise Billing: What You Need to Know about HB 1004

July 15, 2020

Please join Krieg DeVault attorneys [Stephanie T. Eckerle](#) & [Brandon W. Shirley](#) on Thursday, July 23 from 12:00pm until 1:00pm EDT as they explain the practical impact of HB 1004 and the new requirements imposed upon both health care practitioners and health care facilities, such as hospitals, ambulatory surgical centers, laboratories and infusion centers.

Topic Overview:

In an attempt to make billing and patient charges more transparent, HB 1004 has created a new regulatory framework that will require both practitioners and health care facilities to implement new policies, procedures and protocols related to:

- providing notice to patients of their right to request a good faith estimate of non-emergency services
- providing patients with good faith estimates of non-emergency services upon request
- obtaining consent from patients to charge above in-network rates under certain circumstances
- coordination that will need to take place between practitioners, health care facilities and health carriers to implement HB 1004

This webinar will also review the various deadlines for making these changes under HB 1004.
