

Compliance Guidance

Provider organizations are encouraged to implement effective compliance programs and Krieg DeVault lawyers are uniquely skilled counselors on compliance implementation and review having assisted numerous clients nation-wide on such matters. Our firm helps clients develop compliance strategies, including review and analysis of laws and regulations in all 50 states involving such areas as fraud and abuse, financial arrangements with referral sources, licensing, change of ownership, patient privacy and reimbursement. When necessary, we can help hospitals and health systems negotiate and implement corporate integrity agreements (CIAs) with the Office of Inspector General to resolve False Claim Act allegations, civil monetary penalty cases, Anti-Kickback Statute and Stark Act issues, and issues reported through the OIG Self-Disclosure Protocol and the CMS Self Referral Disclosure Protocol.
